Plymouth Tavern, 1115 State St. Erie PA

5.30pm Social 6.00pm Dinner Speaker to follow
\$18 SPE member/\$20 non-member/\$10 SPE Student Member

How to Build Relationships that Build Workforce and How to Be the Workforce Industry Wants

Topic:

As a plastics professional have you found yourself needing an enthusiastic engineer/polymer scientist, but can't find the right candidate? As a student looking for a career that will utilize your skills and interests, are you having a difficult time connecting with someone who can offer the right job for you? SPE has offered me outstanding opportunities to engage young engineers and help build a pipeline of talented workforce. I'll share my stories, techniques, success stories (and some failures), and invite you to share your challenges and needs. Expect a lively and interactive discussion leading to action and the accomplishment of your goals.

Speaker: Eve Vitale, Society of Plastics Engineers

Eve Vitale's passion is connecting with students of all ages and offering them the opportunity of plastics as a career path. She currently serves as the SPE Foundation Director supporting the mission of plastics industry workforce development through educational initiatives. She is on the Detroit Section Board and will be president in 2018. In her work as a development professional at Kettering University she helped grow the SPE student chapter to the 2nd largest in the country in just over a year. She owns an engineering consulting firm that specializes in post-industrial recycling solutions and is an active member of the PLASTICS Industry Association. Eve holds a BSME from Oakland University and an MSE with a concentration in manufacturing from Kettering University

Menu: Wings, Pizza, Vegetables/Dip, cash bar

RSVP: www.nwpaspe.org or vial email to lad115@psu.edu

We hope to see you there!
